4th World Conference on Byproducts of Palms & their Applications

4th BYPALMA CONFERENCE
Al Ain, October 1st-3rd, 2026

Towards a Palm-Based Bioeconomy

Organizers

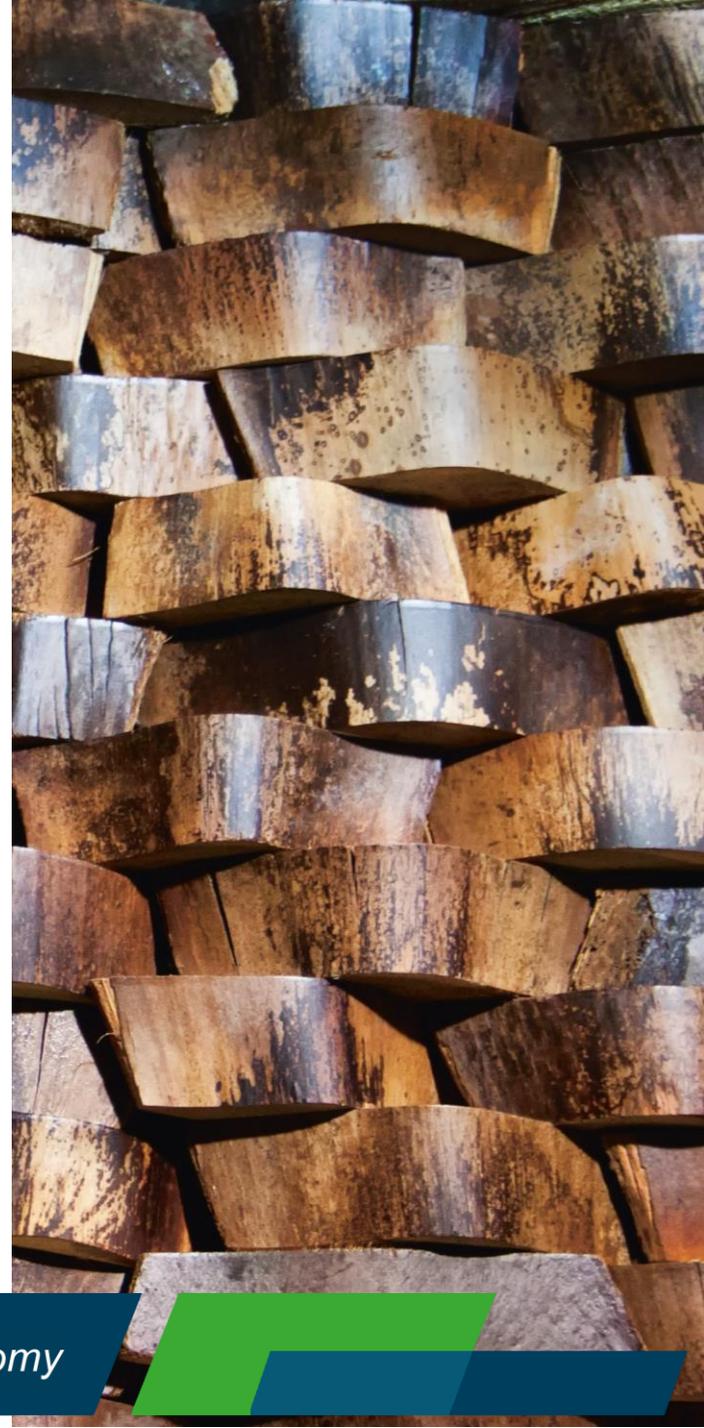

PALM BYPRODUCTS VALORIZATION

Sustainable Bio-Resource

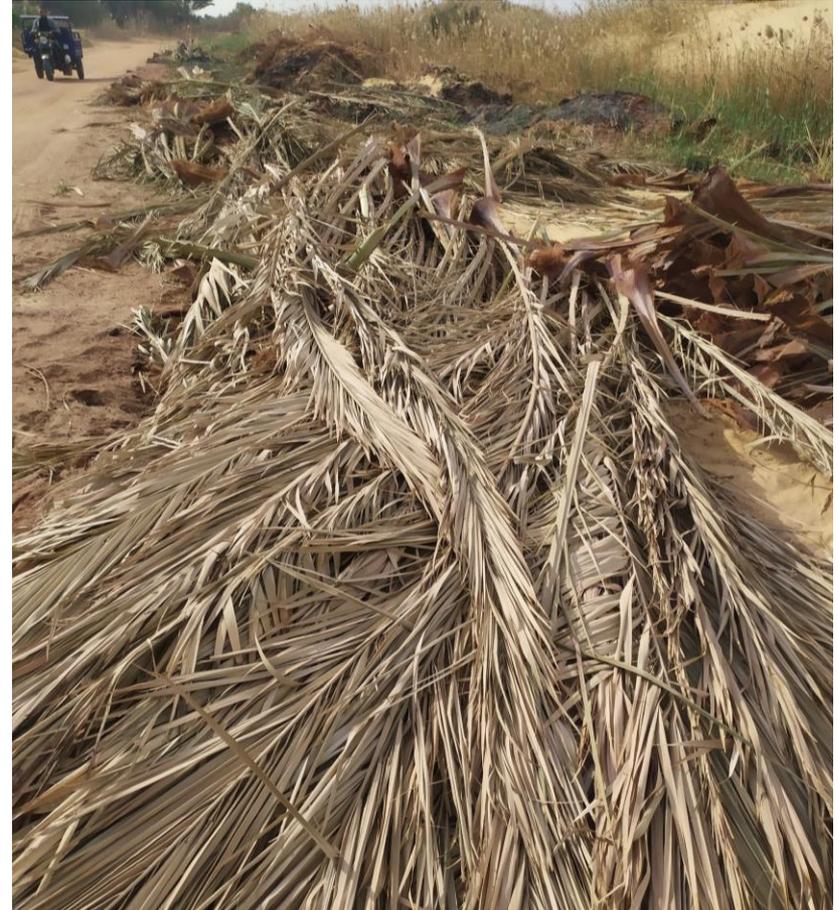

Towards a *Palm-Based* Bioeconomy

The Palmae family includes diverse species that support the livelihoods of millions worldwide.

However, their byproducts are often treated as waste, despite representing a sustainable resource for bio-based industries ranging from textiles and wood substitutes to pulp, chemicals, and advanced composite.

UAE VISION 2031

Sustainability Inspirations

“Fueling the Green Revolution:

We the UAE, a world leader in environmental sustainability, at the forefront of green innovation, and a pioneer for a clean, emissions-free future.”

“Towards a Palm-Based Bioeconomy”

The UAE hosts around 40 mil date palms, producing over 800 Ktons of pruning byproducts annually, a rich bioresource with potential to drive the country’s future bioeconomy.

BYPALMA CONFERENCE

Towards a Palm-Based Bioeconomy

ByPalma is the world's only conference dedicated exclusively to the byproducts of palm plantations and their current and potential applications.

It brings together leading researchers, innovators, and industry professionals to explore how palm residues, from all members of the Palmae family, can drive the transition toward a sustainable circular bioeconomy.

Conference Objectives

Bring together researchers and practitioners working in the area of industrial utilization of palm by-products and provide a live dialogue and exchange of experience between them.

Rediscover palm by-products and maximize their added-value via industrial technological advancement that can help in the environmental sustainability and circular bio economy.

Establish an international network of scientists, artisans, and industry professionals active in the area of palm by-products R&D, manufacturing, and crafts.

From Waste to Value-Added Products

Composites

Textiles

Pulp & Paper

Fodder

Construction

Wood Panels

Biofuel

Pharmaceutical

Conference Topics

Valorization of palm byproducts in;

- Construction and building
- Pulp and paper
- Sustainable packaging
- Textiles and fibers
- Biocomposites
- Lumber substitutes
- Nano cellulose and nano composites
- Organic fertilizers
- Natural fodder and silage
- Biofuel and biochar
- Biotechnology
- Modern and traditional crafts
- 3D printing
- Pharmaceutical and cosmetics

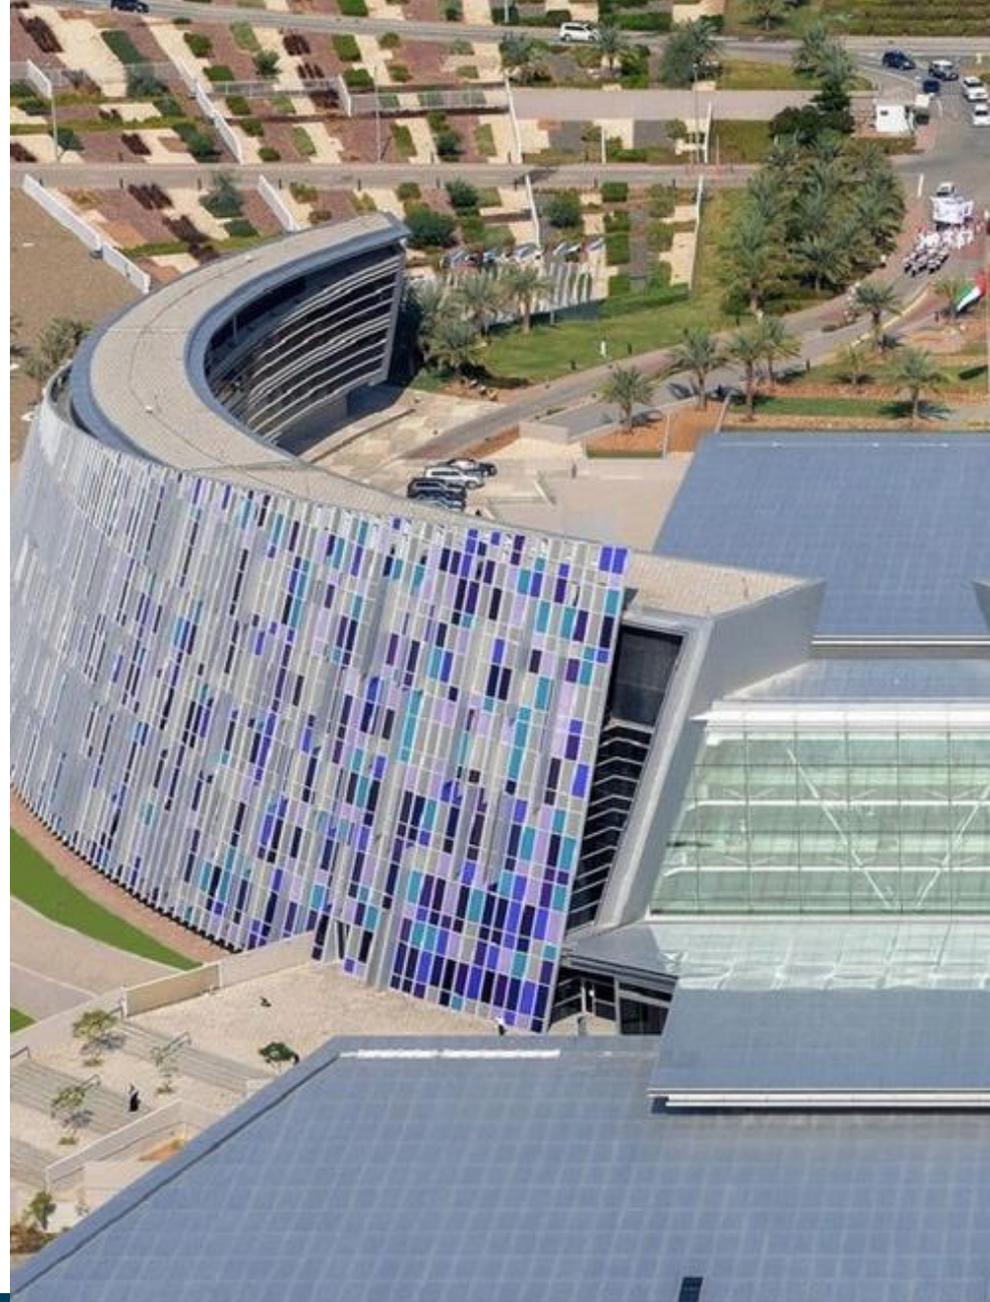

Time & Venue

The conference is scheduled from the
14th to 16th of October 2026.

United Arab Emirates University
Al Ain, UAE

Organizers

United Arab Emirates University (UAEU)

United Arab Emirates University (UAEU) is a regional leader in research and innovation, focusing on sustainability and valorizing palm byproducts, supporting the UAE's Vision 2031.

International Association for Palm Byproducts

ByPalma Association is the founder of ByPalma conference, and it's active in the area of promoting and supporting the utilization of palm byproducts for sustainable development.

SPONSORSHIP

Supporting Sustainable Development

Towards a *Sustainable* Bioeconomy

Why Sponsor ByPalma?

Main reasons to consider sponsoring ByPalma 2026:

Exposure to a wide stratum of palm growers, policy makers, international organization, researchers and industry.

Building awareness about your company and its brands.

Participating in realization of We the UAE vision 2031 through sustainable development and environment preservation which improve life goodness, diverse and sustainable bioeconomy and maximize local content.

Helping you in communicating your key corporate mission and values and associate your brand with R&D activities, sending a strong and inspiring message to the regional business community.

Promoting your company/ organization products and services.

Diversifying your social responsibility profile.
